

Health Checkup at Bukit Gong, Chini

Volunteer Manhours: 90
Total Number of Beneficiaries: 170
Actual Amount Invested in
Community: RM 13,477

June 2024

Program Description:

Here at Wasco, we believe that everyone deserves access to quality healthcare and the knowledge to live a healthy life. In collaboration with the dedicated medical team of Ivorymedic Clinic, Kuantan, we embarked on a mission to bring healthcare directly to the vibrant Orang Asli community in Bukit Gong, Chini, Pahang, who often face challenges in accessing medical services due to their rural location.

During the CSR initiative, we provided comprehensive health check-ups, including blood pressure, diabetes, and BMI assessments. The response was overwhelmingly inspiring, with participants ranging from young children to elders over 60 years old. It was truly a heart-warming sight to see the community's eagerness to understand and improve their overall health.

In addition to the check-ups, our team also conducted health awareness sessions, emphasising the importance of regular health check-ups and healthy living practices with the aim to educate the community on managing their health proactively. Understanding the essential needs of the community, we also distributed groceries and medicines to ensure they have adequate resources to maintain their health and well-being.

No community event is complete without sharing a meal, as the day culminated with a simple yet intimate lunch together, with the team rallying together to provide a nutritious meal distribution, fostering a sense of togetherness and community spirit.

This initiative was not just about providing immediate aid but about planting seeds of health awareness and self-care that will benefit the Orang Asli community for years to come. The joy and gratitude we received from the community members were truly humbling and ultimately serves as the highlight of this experience.

A huge thank you to the Ivorymedic Clinic medical team for their unwavering support and dedication. Together, we are making a difference, one health check-up at a time.
