

Maendeleo Programme

Volunteer Manhours: 86
Total Number of Beneficiaries: 657
Actual Amount Invested in
Community: RM 470,075

January 2024

Program Description:

Wasco Berhad (Wasco), through its operations in Tanzania, Wasco ISOAF, recently joined forces with The East African Crude Oil Pipeline Project (EACOP) team together with construction contractor, Basenet and talented carpenters Andrew and Zabron, to successfully deliver three completed community support projects to the Ilalo village, Selemi village and Wella Il village.

These initiatives are implemented as part of the Maendeleo Programme, in its aim to improve the socio-economic progress of Igusule ward (region) and its people. The delivered projects encompass the successfully revitalised Ilalo village office, two new classrooms in the Selemi village and brand-new school necessities, such as 108 school desks, three office cabinets, eight office desks and eight office chairs. All three projects were handed over officially to the village councils in a joyous and jubilant occasion throughout the villages, featuring traditional dances, songs, feasts and warm hospitality across its residents.

The team were truly honoured to be part of the celebrations, and took pride in the collaborative efforts to consistently safeguard the well-being of the villages in the Ugusule ward. The heartfelt sentiments expressed in their kind words (refer to the quote images) serve as an enduring source of inspiration, propelling us forward in our mission to spearhead impactful initiatives for the betterment of the Ugusule ward. We look forward to collectively work together towards safer, happier, and more connected communities.
