

School Infrastructure Upgrades - School Toilets and Fabricating Benches

Volunteer Manhours: 2,973
Total Number of Beneficiaries: 1,300
Actual Amount Invested in Community: RM 19,860

May 2024

Program Description:

Since establishing its operations in Indonesia, Wasco has been a catalyst for positive change in Batam's local communities. A flagship programme was recently kickstarted, involving the upgrading of school infrastructure, aiming to cultivate secure and enriching learning environments for the area's children. The overarching goal is to empower these young minds, unlocking their academic potential and charting a course toward a brighter future.

This comprehensive infrastructure enhancement encompasses vital areas, including constructing an art studio stage, concreting school yards, building new restrooms, renovating existing facilities, repairing classroom ceilings, and providing essential furniture for schools. Four schools - SDN007, SDN006, SMPN38, and SDN011 - situated within a 5KM radius of Wasco's base in Batam, boasting a combined student population of 4,000, stand to benefit from this transformative initiative.
