

Aftermarket Spares

Wasco provides comprehensive aftermarket product support with a supply of trained manpower and original spare parts. Once clients take delivery of equipment, we work with our partners to provide spares for preventive maintenance as well as major overhauls. Technical advice to increase the life of parts by optimising equipment efficiency is also available. Swing equipment for large high-value components is also available to reduce downtime and production disruption. We provide factory-authorized parts at competitive prices along with our service offering to provide a single-stop solution. The parts are warranted as per OEM recommendations. Wasco can also manage the inventory on behalf of customers, ensuring significant cost reductions and efficient parts utilisation.

The advantages offered to the client by Wasco are:

- Original spare parts with warranty
- Increased parts efficiency
- Extended support during unscheduled inspections
- Proactive contract management
- Technology improvements & upgrades
- Logistics and inventory management
- Quick response time with centralised support
- Workshop in Singapore and Dubai
- Repair kits for high-value items to optimise costs
- Dedicated contract manager
