

Centrifugal Compressor

Wasco can package and modularise centrifugal compressors for on-shore and off-shore applications. Wasco specialises in modularising centrifugal gas compressors for the FPSO industry and has the experience to meet stringent specifications.

For offshore applications, Wasco can design and engineer a compact single lift modules integrated with a compressor, driver, process equipment, controls and auxiliaries to minimise the commissioning work at the shipyard/offshore. We work closely with various compressor OEMs to deliver these modules to the highest quality standards.
